**Road Map to
FEN WETLANDS in JACK CREEK HEADWATERS**

From Hwy 97, 4.0 miles south of the Hwy 58 junction to Eugene, and 4.3 miles north of the town of Chemult, turn east on a major gravel road, Forest Road 94. Follow this road east as it climbs over the Walker Rim and then across the Jack Creek headwaters plateau.

At 11.6 miles, just before a sweeping S-turn in Road 94, look for a minor road junction with dirt side roads leading both north and south. Near the turnoff for the road leading north is an orange "Water Source" stake partially hidden in the roadside brush along Road 94.

This junction is at the center of the pumice fen area. Please refer to the detailed Hiking Map (a separate download) for further road details.
